Subject Index of Volume B8

- Acoustic plate mode biosensor, 191
- Amine vapours
fibre-optic fluorescing sensor for, 137
- Ammonia sensitivity
of Pt/GaAs Schottky barrier diodes; improvement of sensor with organic layer, 249
- Arsenic
ammonia sensitivity of Pt/GaAs Schottky barrier diodes; improvement of sensor with organic layer, 249
- Biochemical oxygen demand
microbial membrane-modified dissolved oxygen probe for rapid BOD measurement, 167
- Biosensor(s)
acoustic plate mode, 191
amperometric for glucose and lactate, 53
metallocene-mediated amperometric, for one-shot glucose determination, 59
transient response of electrochemical, with asymmetrical sandwich membranes, 65
- Blood gas analysis
micro flow cell for, realizing very small sample volume, 205
- Bromophenol Blue
immobilized, as sensing element in optical pH sensor, 99
- Bulk to interfacial
types of sensors, 73
- CAD applications
ISFET model for, 261
- Ceramic sensor device materials, 117
- CHEMFETs
molecular materials for transduction of chemical information by, 211
- Chemical grafting
sensitization of dielectric surfaces by; application to pH ISFETs and REFETs, 221
- Chemical industry
surface acoustic wave gas sensors; developments in, 27
- Chemical information
molecular materials for transduction of, by CHEMFETs, 211
- Chemical sensor(s)
integrated opto-, 103
significance of feedback control for, 47
simple intrinsic optical-fibre, 161
- Chlorine gas
potentiometric sensor, 41
- Conduction-concentration relationship
in chemoresistive thick-film SnO₂ gas sensors, 151
- Crystalline structure
gas-sensing properties of metallo-phthalocyanine thin films as function of, 257
- Dielectric surfaces
sensitization of, by chemical grafting; application to pH ISFETs and REFETs, 221
- Drift effect
thin insulator films chemically sensitized by ion implantation for use in ISFETs; studies on, in NAS membranes, 227
- Dynamic characteristics
new strategy for development of gas sensor based on; principle and preliminary experiment, 187
- Electrical characterization
of solid-state gas sensors, 173
- Electrical measurements
properties of polycrystalline gas sensors based on d.c. and a.c., 231
- Electronic nose
odour discrimination with, 1
- Feedback control
significance of, for chemical sensors, 47
- FET
characteristics and gas-sensing behaviour of
Sn-oxide-gate FET, 89
- Fibre-optic fluorescing sensor
for amine vapours, 137
- Fluorescing sensor
fibre-optic, for amine vapours, 137
- Gallium
ammonia sensitivity of Pt/GaAs Schottky barrier diodes; improvement of sensor with organic layer, 249
- Gas detection
high-sensitivity materials for, 237
Lu bisphthalocyanine thin films for, 129
- Gas/odor identification
by semiconductor gas-sensor array and analog artificial neural network circuit, 181
- Gas sensing
surface plasmon resonance on gratings as novel means for, 155
- Gas-sensing properties
of metallo-phthalocyanine thin films as function of their crystalline structure, 257
- Gas-sensing behaviour
of Sn-oxide-gate FET, characteristics and, 89
- Gas sensor(s)
conduction-concentration relationship in chemoresistive thick-film SnO₂, 151
electrical characterization of solid-state, 173
new strategy for development of, based on dynamic characteristics; principle and preliminary experiment, 187
properties of polycrystalline, based on d.c. and a.c. electrical measurements, 231
surface acoustic wave, 33
surface acoustic wave; developments in chemical industry, 27
- Gas-sensor array
gas/odor identification by semiconductor, and analog artificial neural-network circuit, 181
- Glow discharge polymer layers
as humidity sensors, study and application of, 21
- Glucose
amperometric biosensor for, and lactate, 53

- metallocene-mediated amperometric biosensor for one-shot, determination, 59
- Humidity sensor(s)
 - glow discharge polymer layers as, study and application of, 21
 - I-doped polyphenylacetylene thin film as humidity sensor, 123
- Hydrogen sensor(s)
 - methods for preparation of NO, NO₂ and H₂ sensors based on Sn oxide thin films, grown by means of r.f. magnetron sputtering technique, 79
 - new, with rare earth complex fluoride, 179
- Interfaces
 - state and perspectives of research on surfaces and, 267
- Iodine
 - I-doped polyphenylacetylene thin film as humidity sensor, 123
- Ionic exchange and selectivity
 - of NASICON sensitive membranes, 245
- Ion implantation
 - thin insulator films chemically sensiblized by, for use in ISFETs; studies on drift effect in NAS membranes, 227
- ISFET(s)
 - model for CAD applications, 261
 - sensitization of dielectric surfaces by chemical grafting; application to pH, and REFETs, 221
 - thin insulator films chemically sensiblized by ion implantation for use in; studies on drift effect in NAS membranes, 227
- Lactate
 - amperometric biosensor for glucose and, 53
- Lutetium bisphthalocyanine
 - thin films for gas detection, 129
- Membranes
 - application of N-implanted Si for mesa structures and thin, 93
 - ionic exchange and selectivity of NASICON sensitive, 245
 - thin insulator films chemically sensiblized by ion implantation for use in ISFETs; studies on drift effect in NAS, 227
 - transient response of electrochemical biosensors with asymmetrical sandwich, 65
- Mesa structures
 - application of N-implanted Si for, and thin membranes, 93
- Metallocene
 - mediated amperometric biosensor for one-shot glucose determination, 59
- Metallo-phthalocyanine
 - gas-sensing properties of, thin films as function of crystal-line structure, 257
- Microbial membrane
 - modified dissolved oxygen probe for rapid biochemical oxygen demand measurement, 167
- Micro flow cell
 - for blood gas analysis realizing very small sample volume, 205
- Molecular materials
 - for transduction of chemical information by CHEMFETs, 211
- Multisensors
 - multi-compound layers in, 13
- NASICON
 - ion exchange and selectivity of, sensitive membranes, 245
- Neural-network circuit
 - gas/odor identification by semiconductor gas-sensor array and analog artificial, 181
- Nitrogen
 - application of N-implanted Si for mesa structures and thin membranes, 93
- Nitrogen oxide sensors
 - methods for preparation of NO, NO₂ and H₂ sensors based on Sn oxide thin films, grown by means of r.f. magnetron sputtering technique, 79
- Odour discrimination
 - with electronic nose, 1
- Optical absorption studies
 - of tetragonal and cubic thin-film yttria-stabilized zirconia, 253
- Optical-fibre chemical sensor
 - simple intrinsic, 161
- Optical pH sensor
 - immobilized Bromophenol Blue as sensing element in, 99
- Opto-chemical sensors
 - integrated, 103
- Oxygen probe
 - microbial membrane-modified dissolved, for rapid biochemical oxygen demand measurement, 167
- Oxygen sensor(s)
 - based on ionically conductive polymer poly(dimethyldiallylammonium chloride), 199
- pH sensor
 - immobilized Bromophenol Blue as sensing element in optical, 99
- Platinum
 - ammonia sensitivity of Pt/GaAs Schottky barrier diodes; improvement of sensor with organic layer, 249
- Poly(dimethyldiallylammonium chloride)
 - oxygen sensors based on ionically conductive polymer, 199
- Polyphenylacetylene
 - I-doped, thin film as humidity sensor, 123
- Potentiometric sensor
 - chlorine gas, 41
- Rare earth complex fluoride
 - new hydrogen sensor with, 179
- REFETs
 - sensitization of dielectric surfaces by chemical grafting; application to pH ISFETs and, 221
- Research on surfaces and interfaces
 - state and perspectives of, 267
- R.f. magnetron sputtering technique
 - methods for preparation of NO, NO₂ and H₂ sensors based on Sn oxide thin films, grown by means of, 79
- Schottky barrier diodes
 - ammonia sensitivity of Pt/GaAs; improvement of sensor with organic layer, 249
- Silicon
 - application of N-implanted Si for mesa structures and thin membranes, 93
- Sodium aluminosilicate (NAS) membranes
 - thin insulator films chemically sensiblized by ion implantation for use in ISFETs; studies on drift effect in, 227
- Surface acoustic wave gas sensors
 - SAW gas sensors, 33
 - developments in chemical industry, 27

Surface plasmon resonance

on gratings as novel means for gas sensing, 155

Tin oxide

characteristics and gas-sensing behaviour of

Sn-oxide-gate FET, 89

conduction-concentration relationship in chemoresistive thick-film SnO₂ gas sensors, 151

methods for preparation of NO, NO₂ and H₂ sensors based on Sn oxide thin films, grown by means of r.f. magnetron sputtering technique, 79

Torsion-wave crystal device

in vitro urea sensor using, 143

Transient response

of electrochemical biosensors with asymmetrical sandwich membranes, 65

Urea sensor

in vitro, using torsion-wave crystal device, 143

Yttrium

optical absorption studies of tetragonal and cubic thin-film yttria-stabilized zirconia, 253

Zirconia

optical absorption studies of tetragonal and cubic thin-film yttria-stabilized, 253
